FEEDERS

Feeders

ABON ENGINEERING

ABON can offer a full range of Feeders including custom design, to suit any hopper (retrofit).

- * Hopper Feeders (horizontal, inclined and radius) complete with large bottom hopper.
- * Reclaim Feeders (horizontal, inclined and radius) complete with base and footing.

Some of the features of our Feeder range are:

- * Via modular construction and design, a wide range of lengths can be accommodated to reduce retaining wall height.
- * A large throat opening encouraging free flow.
- * Exceptionally low conveyor speeds minimise wear.
- * Hopper bottom and skirts are manufactured from hard wearing liner material.
- * Insensitive to clay and sticky materials.
- * All oil lubrication.
- * Robust chain design.
- * Electric Variable Speed Drive is operationally clean and low maintenance.

Contact us with your Hopper / Feeder requirement.
